Art Unit: 2878

## DETAILED ACTION

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-11, drawn to a method of making an IR medium using a polymer, classified in class 427, subclass 162.
  - II. Claims 12-30, drawn to a method of making an IR detection card and the description of an IR detection card, classified in class 250, subclass 458.1.
  - III. Claims 31-34, drawn to a method of making an IR detection card using a monomer, classified in class 264, subclass 319.
  - IV. Claim 35, drawn to a method of measuring pulses, classified in class 250, subclass459.1.
- 2. Inventions (I and II) and (II and III) are related as combination and sub combination. Although invention II requires a detection medium, it does not require the specific IR detection medium disclosed in inventions I or III. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because both claim a method for making an IR detection medium, however, invention III does not require the specific polymer of invention I. The subcombination has separate utility because by using different processing steps and different materials will yield a different IR detection medium.

Application/Control Number: 09/834,727

Art Unit: 2878

3. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as using a monomer and a polymer in the IR detection medium. See MPEP § 806.05(d).

- 4. Inventions (I, II or III) and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case invention IV can be made without using inventions I, II or III.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Robert Hollingshead on February 12, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Application/Control Number: 09/834,727

Art Unit: 2878

## Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christine Sung whose telephone number is 703-305-0382. The examiner can normally be reached on Monday- Friday 7-4 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Porta can be reached on 703-308-4852. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-0956 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
